

Author Index, Volumes 33-40

- Aboubakar, Y., *see* Ambassa-Kiki, R. et al.
- Aggarwal, G.C., A.S. Sidhu, N.K. Sekhon, K.S. Sandhu and H.S. Sur
Puddling and N management effects on crop response in a rice-wheat cropping system . 36 (1995) 129
- Agus, F., D.K. Cassel and D.P. Garrity
Soil-water and soil physical properties under contour hedgerow systems on sloping
oxisols . 40 (1997) 185
- Alakukku, L. and P. Elonen
Long-term effects of a single compaction by heavy field traffic on yield and nitrogen
uptake of annual crops . 36 (1995) 141
- Alakukku, L.
Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the
properties of clay and organic soils . 37 (1996) 211
- Alakukku, L.
Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the
properties of fine-textured and organic soils . 37 (1996) 223
- Almendros, G., *see* López-Fando, C. et al.
- Alvarez, R., R.A. Díaz, N. Barbero, O.J. Santanoglia and L. Blotta
Soil organic carbon, microbial biomass and CO₂-C production from three tillage
systems . 33 (1995) 17
- Ambassa-Kiki, R., Y. Aboubakar and T. Boulama
Zero-tillage for rice production on Cameroonian Vertisols . 39 (1996) 75
- Anthony, D.T.W., *see* Hulme, P.J. et al.
- Arrúe, J.L., *see* López, M.V. et al.
- Arshad, M.A., *see* Franzluebbers, A.J. et al.
- Arshad, M.A., *see* Gill, K.S. et al.
- Arvidsson, J. and I. Håkansson
Do effects of soil compaction persist after ploughing? Results from 21 long-term field
experiments in Sweden . 39 (1996) 175
- Arvidsson, J., *see* Watts, C.W. et al.
- Azooz, R.H., B. Lowery and T.C. Daniel
Tillage and residue management influence on corn growth . 33 (1995) 215
- Baker, C.J., *see* Sojka, R.E. et al.
- Ball, B.C., M.V. Cheshire, E.A.G. Robertson and E.A. Hunter
Carbohydrate composition in relation to structural stability, compactibility and plasticity
of two soils in a long-term experiment . 39 (1996) 143
- Baranowski, P., *see* Usowicz, B. et al.
- Barber, R.G., M. Orellana, F. Navarro, O. Diaz and M.A. Soruco
Effects of conservation and conventional tillage systems after land clearing on soil
properties and crop yield in Santa Cruz, Bolivia . 38 (1996) 133
- Barbero, N., *see* Alvarez, R. et al.
- Bello, A., *see* López-Fando, C. et al.
- Bendotti, S., *see* Proffitt, A.P.B. et al.

- Blotta, L., *see* Alvarez, R. et al.
- Boiffin, J., *see* Richard, G. et al.
- Boiffin, J., *see* Tamet, V. et al.
- Bonari, E., M. Mazzoncini and A. Peruzzi
Effects of conventional and minimum tillage on winter oilseed rape (*Brassica napus* L.)
in a sandy soil 33 (1995) 91
- Borin, M., C. Menini and L. Sartori
Effects of tillage systems on energy and carbon balance in north-eastern Italy 40 (1997) 209
- Boström, U.
Earthworm populations (Lumbricidae) in ploughed and undisturbed leys 35 (1995) 125
- Boswell, R.C., *see* Moffat, A.J. et al.
- Boulama, T., *see* Ambassa-Kiki, R. et al.
- Braunack, M.V.
Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*,
L. Merr.) and maize (*Zea mays*, L.) 33 (1995) 149
- Bristow, K.L., *see* Weaich, K. et al.
- Brix-Davis, K.A., *see* Clay, D.E. et al.
- Brown, A.D., A.R. Dexter, W.C.T. Chamen and G. Spoor
Effect of soil macroporosity and aggregate size on seed-soil contact 38 (1996) 203
- Burmester, C.H., *see* Mullins, G.L. et al.
- Burpee, C.G., *see* Pierce, F.J. et al.
- Busscher, W.J., J.H. Edwards, M.J. Vepraskas and D.L. Karlen
Residual effects of slit tillage and subsoiling in a hardpan soil 35 (1995) 115
- Campbell, C.A., B.G. McConkey, R.P. Zentner, F. Selles and D. Curtin
Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic
Haploboroll in southwestern Saskatchewan 37 (1996) 3
- Cantero-Martinez, C., G.J. O'Leary and D.J. Connor
Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system.
1. Soil water and nitrogen conservation, crop growth and yield 34 (1995) 79
- Çarman, K.
Effect of different tillage systems on soil properties and wheat yield in Middle Anatolia . 40 (1997) 201
- Carter, M.R.
Characterization of soil physical properties and organic matter under long-term primary
tillage in a humid climate 38 (1996) 251
- Carter, M.R., *see* Sturz, A.V. et al.
- Cass, A., *see* Weaich, K. et al.
- Cassel, D.K. and M.G. Wagger
Residue management for irrigated maize grain and silage production 39 (1996) 101
- Cassel, D.K., *see* Agus, F. et al.
- Castrignandò, A., R. Colucci, D. De Giorgio, V. Rizzo and M. Stelluti
Tillage effects on plant extractable soil water in a silty clay vertisol in Southern Italy . . 40 (1997) 227
- Cerisola, C., *see* Hernández, J.L. et al.
- Chamen, W.C.T., R.E. Cope, D.J. Longstaff, D.E. Patterson and C.D. Richardson
The energy efficiency of seedbed preparation following mouldboard ploughing 39 (1996) 13
- Chamen, W.C.T., *see* Brown, A.D. et al.
- Chan, K.Y. and D.P. Heenan
The influence of crop rotation on soil structure and soil physical properties under
conventional tillage. 37 (1996) 113
- Chan, K.Y.
Strength characteristics of a potentially hardsetting soil under pasture and conventional
tillage in the semi-arid region of Australia 34 (1995) 105
- Chancellor, W.J., *see* Glancey, J.L. et al.
- Chaudhary, M.R., *see* Gill, K.S. et al.
- Cheshire, M.V., *see* Ball, B.C. et al.

- Chi, L. and S. Tessier
A portable micro-penetrometer for measuring seed row compaction 34 (1995) 27
- Clay, D.E., T.E. Schumacher and K.A. Brix-Davis
Carbon and nitrogen mineralization in row and interrow areas of chisel and ridge tillage systems 35 (1995) 167
- Collins, B.A. and D.B. Fowler
Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding. 39 (1996) 199
- Colucci, R., *see* Castrignanò, A. et al.
- Connor, D.J., *see* Cantero-Martinez, C. et al.
- Conyers, M.K., D.P. Heenan, G.J. Poile, B.R. Cullis and K.R. Helyar
Influence of dryland agricultural management practices on the acidification of a soil profile. 37 (1996) 127
- Cook, S.M.F., S.C. Gupta, T. Woodhead and W.E. Larson
Soil physical constraints to establishment of mungbeans (*Vigna radiata* L. Wilczek) in paddy rice (*Oryza sativa* L.) soils 33 (1995) 47
- Cope, R.E., *see* Chamen, W.C.T. et al.
- Cosentino, D., *see* Costantini, A. et al.
- Costantini, A., D. Cosentino and A. Segat
Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina. 38 (1996) 265
- Culley, J.L.B., *see* Hayhoe, H.N. et al.
- Cullis, B.R., *see* Conyers, M.K. et al.
- Curnoe, W.E., *see* Reynolds, W.D. et al.
- Curtin, D., *see* Campbell, C.A. et al.
- Cybulko, W.G., *see* Medvedev, V.V. et al.
- Daniel, T.C., *see* Azooz, R.H. et al.
- Darmora, D.P. and K.P. Pandey
Evaluation of performance of furrow openers of combined seed and fertiliser drills. . . . 34 (1995) 127
- De Figueiredo, T., *see* van Wesemael, B. et al.
- De Giorgio, D., *see* Castrignanò, A. et al.
- Deibert, E.J.
Dry bean production with various tillage and residue management systems 36 (1995) 97
- De Oliveira, E.L. and M.A. Pavan
Control of soil acidity in no-tillage system for soybean production 38 (1996) 47
- Dexter, A.R., *see* Brown, A.D. et al.
- Dexter, A.R., *see* Watts, C.W. et al.
- Dexter, A.R., *see* Whalley, W.R. et al.
- Dexter, A.R., *see* Hallet, P.D. et al.
- Díaz, O., *see* Barber, R.G. et al.
- Díaz, R.A., *see* Alvarez, R. et al.
- Dickson, J.W. and R.M. Ritchie
Zero and reduced ground pressure traffic systems in an arable rotation 1. Cultivation power requirement 38 (1996) 71
- Dickson, J.W. and R.M. Ritchie
Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses 38 (1996) 89
- Döll, H., *see* Tijink, F.G.J. et al.
- Domžal, H., *see* Horn, R. et al.
- Dumitru, E., *see* Watts, C.W. et al.
- Dumitru, E., *see* Whalley, W.R. et al.
- Dürr, C., *see* Tamet, V. et al.
- Duval, Y., *see* Richard, G. et al.
- Dwyer, L.M., *see* Hayhoe, H.N. et al.

- Earl, R.
Prediction of trafficability and workability from soil moisture deficit 40 (1997) 155
- Edwards, J.H., *see* Busscher, W.J. et al.
- Ekeberg, E. and H.C.F. Riley
Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway 39 (1996) 131
- Elonen, P., *see* Alakukku, L. et al.
- Erbach, D.C., *see* Swan, J.B. et al.
- Etchevers Barra, J.D., *see* Oleschko, K. et al.
- Evans, S.D., M.J. Lindstrom, W.B. Voorhees, J.F. Moucrief and G.A. Nelson
Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield 38 (1996) 35
- Fowler, D.B., *see* Collins, B.A. et al.
- Franzluebbers, A.J. and F.M. Hons
Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage 39 (1996) 229
- Franzluebbers, A.J. and M.A. Arshad
Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate 39 (1996) 1
- Franzluebbers, A.J., F.M. Hons and D.A. Zuberer
Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping 34 (1995) 41
- Fraser, W.J., *see* Lowther, W.L. et al.
- Gajri, P.R., *see* Gill, K.S. et al.
- Garrity, D.P., *see* Agus, F. et al.
- Gebresenbet, G. and P.G. Kaumbutho
Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey 40 (1997) 169
- Ghosh, D.C., *see* Moitra, R. et al.
- Gill, K.S., P.R. Gajri, M.R. Chaudhary and B. Singh
Tillage, mulch and irrigation effects on corn (*Zea mays* L.) in relation to evaporative demand 39 (1996) 213
- Gill, K.S. and M.A. Arshad
Weed flora in the early growth period of spring crops under conventional, reduced, and zero tillage systems on a clay soil in northern Alberta, Canada. 33 (1995) 65
- Girón, V.S., *see* Hernández, J.L. et al.
- Glancey, J.L. and S.K. Upadhyaya
An improved technique for agricultural implement draught analysis 35 (1995) 175
- Glancey, J.L., S.K. Upadhyaya, W.J. Chancellor and J.W. Rumsey
Prediction of agricultural implement draft using an instrumented analog tillage tool 37 (1996) 47
- Godwin, R.J., *see* Shield, I.F. et al.
- Gregorich, E.G., *see* Reynolds, W.D. et al.
- Grossman, R.B., *see* Reinsch, T.G. et al.
- Gu, Y., *see* Wulfsohn, D. et al.
- Guirresse, M. and J.C. Revel
Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Effect of ploughing down the steepest slope 35 (1995) 157
- Guirresse, M., *see* Revel, J.C. et al.
- Gupta, S.C., *see* Cook, S.M.F. et al.
- Håkansson, I. and V.W. Medvedev
Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles 35 (1995) 85
- Håkansson, I., C. van Ouwerkerk and B.D. Soane
Conclusions of the ISTRO Workshop on 'The Effects of Soil Compaction on Physical, Chemical and Biological Factors in the Environment', 25 August 1993, Melitopol, Ukraine 35 (1995) 111

- Håkansson, I., *see* Arvidsson, J. et al.
- Hall, J.K., *see* Watts, D.W. et al.
- Hallet, P.D., A.R. Dexter and J.P.K. Seville
Identification of pre-existing cracks on soil fracture surfaces using dye 33 (1995) 163
- Hampchitvitaya, D., *see* Sharma, P.K. et al.
- Harris, D.
The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana. . . 40 (1996) 73
- Hayhoe, H.N., L.M. Dwyer, D.W. Stewart, R.P. White and J.L.B. Culley
Tillage, hybrid and thermal factors in corn establishment in cool soils. 40 (1996) 39
- Heenan, D.P., *see* Chan, K.Y. et al.
- Heenan, D.P., *see* Conyers, M.K. et al.

Subject Index, Volumes 33–40

Aggregate deformation

Effect of soil macroporosity and aggregate size on seed–soil contact, 38 (1996) 203

Aggregate size

Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*, L. Merr.) and maize (*Zea mays*, L.), 33 (1995) 149

Aggregate stability

Carbohydrate composition in relation to structural stability, compactibility and plasticity of two soils in a long-term experiment, 39 (1996) 143

Aggregate

Identification of pre-existing cracks on soil fracture surfaces using dye, 33 (1995) 163
The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Air permeability

Effects of soil compaction on N-mineralization and microbial-C and -N. I. Field measurements, 38 (1996) 175

Alfisol

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199
A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211
Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31

Alley cropping

Soil-water and soil physical properties under contour hedgerow systems on sloping oxisols, 40 (1997) 185

Analog device

Prediction of agricultural implement draft using an instrumented analog tillage tool, 37 (1996) 47

Ant burrows

Ant burrow effects on water flow and soil hydraulic properties of Sparta sand, 37 (1996) 83

Axle load

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141
Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211
Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

Barley

The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113

Biopores

Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

Bolivia

Effects of conservation and conventional tillage systems after land clearing on soil properties

and crop yield in Santa Cruz, Bolivia, 38 (1996) 133

Botswana

The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana., 40 (1996) 73

Bulk density

A method to predict bulk density of tilled Ap horizons, 34 (1995) 95

Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield, 38 (1996) 35

Puddling and N management effects on crop response in a rice-wheat cropping system, 36 (1995) 129

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Spatial variability of soil thermal properties in cultivated fields, 39 (1996) 85

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic Haploboroll in southwestern Saskatchewan, 37 (1996) 3

Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping, 34 (1995) 41

Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229

C and N mineralization

Carbon and nitrogen mineralization in row and interrow areas of chisel and ridge tillage systems, 35 (1995) 167

C sequestration

Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic Haploboroll in southwestern Saskatchewan, 37 (1996) 3

C:N ratios

Carbon and nitrogen mineralization in row and interrow areas of chisel and ridge tillage systems, 35 (1995) 167

CERES model

Tillage effects on plant extractable soil water in a silty clay vertisol in Southern Italy, 40 (1997) 227

CO₂ emission

Effects of tillage systems on energy and carbon balance in north-eastern Italy, 40 (1997) 209

Calcium

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Cameroonian Vertisols

Zero-tillage for rice production on Cameroonian Vertisols, 39 (1996) 75

Canola

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113

Capillary wetting

A method to predict bulk density of tilled Ap horizons, 34 (1995) 95

Carbohydrates

Carbohydrate composition in relation to structural stability, compactability and plasticity of two soils in a long-term experiment, 39 (1996) 143

Carbon and nitrogen mineralization

Tillage and amendment effects on soil carbon and nitrogen mineralization and phosphorus release, 37 (1996) 239

Carbon dioxide flux

Effects of soil compaction on N-mineralization and microbial-C and -N. I. Field measurements, 38 (1996) 175

Carbon mineralization

Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189

Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1

Soil organic carbon, microbial biomass and CO_2 -C production from three tillage systems, 33 (1995) 17

Carrot

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Century model

Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115

Chemical characteristics

Interactive effects of tillage and crop rotations on yield and chemical properties of soils in semi-arid central Spain, 36 (1995) 45

Chernozem

Soil criteria for assessing the maximum permissible ground pressure of agricultural vehicles on Chernozem soils, 36 (1995) 153

Chernozemic soils

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Clay soil

Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211

Clayey soils

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Clustering

Statistical analysis of wheat root growth patterns under conventional and no-till systems, 38 (1996) 1

Coarse texture soil

Effects of deep tillage on dryland production of redgram (*Cajanus cajan* L.) in Central India, 34 (1995) 17

Coleoptile elongation

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Compacted Vertisol

Repair of the structure of a compacted Vertisol via wet/dry cycles, 38 (1996) 17

Compactibility

Carbohydrate composition in relation to structural stability, compactibility and plasticity of two soils in a long-term experiment, 39 (1996) 143

Compaction

Compaction effects of rubber or metal-tracked tractor passes on agricultural soils, 37 (1996) 37

Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield, 38 (1996) 35

Effects of conservation and conventional tillage systems after land clearing on soil properties and crop yield in Santa Cruz, Bolivia, 38 (1996) 133

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141

Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69

Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211

Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

The effectiveness of cultivation using the winged tine on restored sand and gravel workings, 40 (1997) 111

Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59

Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses, 38 (1996) 89

Zone tillage effects on soil properties and yield and quality of potatoes (*Solanum tuberosum* L.), 35 (1995) 135

Interactions of traffic and tillage applied to cotton on N movement below the root zone of a subsequent wheat crop, 33 (1995) 3

Compaction repair

Repair of the structure of a compacted Vertisol via wet/dry cycles, 38 (1996) 17

Competition

Effectiveness of a strip seeder direct drill for pasture establishment, 38 (1996) 161

Compressive strength

The effect of matric suction on stress-strain relation and strength of three Alfisols, 39 (1996) 45

Cone index

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Conservation tillage

Carbon and nitrogen mineralization in row and interrow areas of chisel and ridge tillage systems, 35 (1995) 167

Characterization of soil physical properties and organic matter under long-term primary tillage in a humid climate, 38 (1996) 251

Effects of conservation and conventional tillage systems after land clearing on soil properties and crop yield in Santa Cruz, Bolivia, 38 (1996) 133

Residue management for irrigated maize grain and silage production, 39 (1996) 101

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Tillage and straw management for modifying physical properties of a subarctic soil, 38 (1996) 239

Weed flora in the early growth period of spring crops under conventional, reduced, and zero tillage systems on a clay soil in northern Alberta, Canada, 33 (1995) 65

Contact area of wheels

Methods for determining the effects of soil compaction produced by traffic and indices of efficiency for reducing these effects, 40 (1997) 239

Controlled traffic

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Conventional tillage

Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway, 39 (1996) 131

Runoff and sediment loss from three tillage systems under simulated rainfall, 39 (1996) 115

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Characterisation of water transmission properties in tilled and untilled soils using tension infiltrometers, 33 (1995) 117

Effects of conventional and minimum tillage on winter oilseed rape (*Brassica napus* L.) in a sandy soil, 33 (1995) 91

Copper

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Corn

Tillage, hybrid and thermal factors in corn establishment in cool soils, 40 (1996) 39

Corn growth

Tillage, mulch and irrigation effects on corn (*Zea mays* L.) in relation to evaporative demand, 39 (1996) 213

Costs

The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273

Cotton nutrition

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Cotyledon

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil

temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Cover crop

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

Critical state

Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161

Crop

Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69

Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses, 38 (1996) 89

Crop establishment

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Enhancement of wheat establishment with modified sowing and fallow management techniques, 36 (1995) 73

Pre-emergent shoot growth of maize (*Zea mays*, L.) as a function of soil strength, 40 (1996) 3

Crop rotation

Interactive effects of tillage and crop rotations on yield and chemical properties of soils in semi-arid central Spain, 36 (1995) 45

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

Structure and pedofeatures of Guanajuato (Mexico) Vertisol under different cropping systems, 37 (1996) 15

Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59

Crop sequence

Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping, 34 (1995) 41

Crop yield

Do effects of soil compaction persist after ploughing? Results from 21 long-term field experiments in Sweden, 39 (1996) 175

Effects of deep tillage on dryland production of redgram (*Cajanus cajan* L.) in Central India, 34 (1995) 17

Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles, 35 (1995) 85

Cropping

Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189

Crust

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Cultivation

The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273

The effectiveness of cultivation using the winged tine on restored sand and gravel workings, 40 (1997) 111

Zero and reduced ground pressure traffic systems in an arable rotation 1. Cultivation power requirement, 38 (1996) 71

Cutting

The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273

DEM

Mapping a three-dimensional soil surface with hand-held 35 mm photography, 34 (1995) 187

Deep fertilization

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Deep placement

Incorporation of limestone into naturally compacted subsoil during deep-ripping, 36 (1995) 21

Deep tillage

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Effects of deep tillage on dryland production of redgram (*Cajanus cajan* L.) in Central India, 34 (1995) 17

Residual effects of slit tillage and subsoiling in a hardpan soil, 35 (1995) 115

Traffic and residue management systems: effects on fate of fertilizer N in corn, 33 (1995) 197

Deep-ripping

Incorporation of limestone into naturally compacted subsoil during deep-ripping, 36 (1995) 21

Degradation

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199

Delayed maturity

Yield and nitrogen uptake of monocropped maize from a long-term tillage experiment on a poorly drained soil, 34 (1995) 145

Denitrification

Influence of long-term tillage, straw and N fertilizer on barley yield, plant-N uptake and soil-N balance, 36 (1995) 165

Developing countries

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Direct drilling

Conservation tillage systems, fungal complexes and disease development in soybean and barley rhizospheres in Prince Edward Island, 34 (1995) 225

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

Effectiveness of a strip seeder direct drill for pasture establishment, 38 (1996) 161

Direct planting

Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway, 39 (1996) 131

Direct seeding

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Dispersible clay

An assessment of the vulnerability of soil structure to destabilisation during tillage. Part I. A laboratory test, 37 (1996) 161

Diversity

Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59

Draft

A modified model to predict soil cutting resistance, 34 (1995) 157

An improved technique for agricultural implement draught analysis, 35 (1995) 175

Draft-speed relationship of simple tillage tools at high operating speeds, 39 (1996) 61

Draft forces

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Draft prediction

Prediction of agricultural implement draft using an instrumented analog tillage tool, 37 (1996) 47

Draught animal power

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Draught force

Zero and reduced ground pressure traffic systems in an arable rotation I. Cultivation power requirement, 38 (1996) 71

Dry bean

Dry bean production with various tillage and residue management systems, 36 (1995) 97

Dryland agriculture

Effect of plant residue and fertilizer on grain yield of dryland rice under reduced tillage cultivation, 34 (1995) 115

Dryland cropping

A comparison between seasonal changes in soil water storage and penetration resistance under conventional and conservation tillage systems in Aragón, 37 (1996) 251

Durum wheat

Tillage effects on plant extractable soil water in a silty clay vertisol in Southern Italy, 40 (1997) 227

Earthworm

Earthworm populations (Lumbricidae) in ploughed and undisturbed leys, 35 (1995) 125

Economics

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

Effective stress

The effect of matric suction on stress-strain relation and strength of three Alfisols, 39 (1996) 45

Efficiency

The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Electro-hydraulic control

A portable micro-penetrometer for measuring seed row compaction, 34 (1995) 27

Emergence

Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*, L. Merr.) and maize (*Zea mays*, L.), 33 (1995) 149

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

Soil physical factors limiting establishment of sorghum and cowpea in two contrasting soil types in the semi-arid tropics, 40 (1996) 89

Emergence force

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Emergence predictions

Pre-emergent shoot growth of maize (*Zea mays*, L.) as a function of soil strength, 40 (1996) 3

Emergence rate index

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Energy

An assessment of the vulnerability of soil structure to destabilisation during tillage. Part I. A laboratory test, 37 (1996) 161

Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69

The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Energy analysis

Effects of tillage systems on energy and carbon balance in north-eastern Italy, 40 (1997) 209

Energy inputs

Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183

Environment

Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69

Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles, 35 (1995) 85

Soil compaction processes and their effects on the structure of arable soils and the environment, 35 (1995) 23

Erosion

Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Effect of ploughing down the steepest slope, 35 (1995) 157

Erosion due to cultivation of calcareous clay soils on the hillsides of south west France. I. Effect of former farming practices, 35 (1995) 147

Tillage and straw management for modifying physical properties of a subarctic soil, 38 (1996) 239

Establishment

Effectiveness of a strip seeder direct drill for pasture establishment, 38 (1996) 161

Fallow management

Enhancement of wheat establishment with modified sowing and fallow management techniques, 36 (1995) 73

Fertilizer

Economic evaluation of topsoil loss in spring wheat production in the northern Great Plains, USA, 37 (1996) 95

Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses, 38 (1996) 89

Fertilizer placement

Dry bean production with various tillage and residue management systems, 36 (1995) 97

Field experiment

Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Effect of ploughing down the steepest slope, 35 (1995) 157

Field pea

The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113

Field traffic

Technical and economic feasibility of low ground pressure running gear, 35 (1995) 99

Fine-textured soils

Yield and nitrogen uptake of monocropped maize from a long-term tillage experiment on a poorly drained soil, 34 (1995) 145

Flax

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

Flow-weighted mean pore radius

Characterisation of water transmission properties in tilled and untilled soils using tension infiltrometers, 33 (1995) 117

Fractal dimensions

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Fractals

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Fracture

Identification of pre-existing cracks on soil fracture surfaces using dye, 33 (1995) 163

Furrow opener

Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127

Fusarium

Conservation tillage systems, fungal complexes and disease development in soybean and barley rhizospheres in Prince Edward Island, 34 (1995) 225

Geometric mean diameter

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Germination

Soil physical factors limiting establishment of sorghum and cowpea in two contrasting soil types in the semi-arid tropics, 40 (1996) 89

Glycine max

Conservation tillage systems, fungal complexes and disease development in soybean and barley rhizospheres in Prince Edward Island, 34 (1995) 225

Control of soil acidity in no-tillage system for soybean production, 38 (1996) 47

Gossypium hirsutum L.

Interactions of traffic and tillage applied to cotton on N movement below the root zone of a subsequent wheat crop, 33 (1995) 3

Grassland

Grassland converted to cropland: Soil conditions and sorghum yield, 33 (1995) 29

Grazing management

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199
A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211

Ground pressure

Technical and economic feasibility of low ground pressure running gear, 35 (1995) 99

Growing degree days

Tillage, hybrid and thermal factors in corn establishment in cool soils, 40 (1996) 39

Hardpan

Residual effects of slit tillage and subsoiling in a hardpan soil, 35 (1995) 115

Harvest date

Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway, 39 (1996) 131

Harvest traffic

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Heavy machines

Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles, 35 (1995) 85

Hedgerows

Soil-water and soil physical properties under contour hedgerow systems on sloping oxisols, 40 (1997) 185

Herbicide

Effectiveness of a strip seeder direct drill for pasture establishment, 38 (1996) 161
The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273
Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Hordeum vulgare

Conservation tillage systems, fungal complexes and disease development in soybean and barley

rhizospheres in Prince Edward Island, 34 (1995) 225

Incorporation of limestone into naturally compacted subsoil during deep-ripping, 36 (1995) 21

Humid temperate climate

Characterization of soil physical properties and organic matter under long-term primary tillage in a humid climate, 38 (1996) 251

Hydraulic conductivity

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Hypocotyl

Emergence and early growth of an epigeal seedling (*Daucus carota* L.): influence of soil temperature, sowing depth, soil crusting and seed weight, 40 (1996) 25

Image analysis

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Infiltration

Residue management for irrigated maize grain and silage production, 39 (1996) 101
Runoff and sediment loss from three tillage systems under simulated rainfall, 39 (1996) 115

Inundated bulk density

A method to predict bulk density of tilled Ap horizons, 34 (1995) 95

Iron

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Irrigated cotton

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

Irrigated rice

Zero-tillage for rice production on Cameroonian Vertisols, 39 (1996) 75

Irrigation

Ant burrow effects on water flow and soil hydraulic properties of Sparta sand, 37 (1996) 83

Irrigation water requirement

Puddling and N management effects on crop response in a rice-wheat cropping system, 36 (1995) 129

Kenya

Comparison of options for sugarcane (*Saccharum officinarum* L.) stool destruction, 33 (1995) 185

Nutrient losses from cropland in the Central Highlands of Kenya due to surface runoff and soil erosion, 33 (1995) 109

Landscape

Erosion due to cultivation of calcareous clay soils on the hillsides of south west France. I. Effect of former farming practices, 35 (1995) 147

Lateral separation

Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127

Leaching

Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115
Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Legume rotation

Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183

Ley

Earthworm populations (Lumbricidae) in ploughed and undisturbed leys, 35 (1995) 125

Limestone

Incorporation of limestone into naturally compacted subsoil during deep-ripping, 36 (1995) 21

Liming

Control of soil acidity in no-tillage system for soybean production, 38 (1996) 47

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Logistic growth model

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Long-term effect

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141
Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

Lupin

The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113

Macropores

Ant burrow effects on water flow and soil hydraulic properties of Sparta sand, 37 (1996) 83

Macroporosity

Effect of soil macroporosity and aggregate size on seed-soil contact, 38 (1996) 203
Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223
Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199

Magnesium

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Maize

Axle load and tillage effects on crop yields on a Mollic Ochraqulf in Northwest Ohio, 37 (1996) 143
Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*, L. Merr.) and maize (*Zea mays*, L.), 33 (1995) 149

Maize emergence

Pre-emergent shoot growth of maize (*Zea mays*, L.) as a function of soil strength, 40 (1996) 3

Maize silage

Residue management for irrigated maize grain and silage production, 39 (1996) 101

Management

The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273

Manganese

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Manure

The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana, 40 (1996) 73

Matric potential

Soil physical factors limiting establishment of sorghum and cowpea in two contrasting soil types in the semi-arid tropics, 40 (1996) 89

Maximum permissible ground pressure

Soil criteria for assessing the maximum permissible ground pressure of agricultural vehicles on Chernozem soils, 36 (1995) 153

Mean emergence date

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Measurement

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Mechanical and manual weed control

Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31

Median emergence time

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Metabolic quotient

Soil organic carbon, microbial biomass and CO₂-C production from three tillage systems, 33 (1995) 17

Methods of fertilization

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Micro-topography

Mapping a three-dimensional soil surface with hand-held 35 mm photography, 34 (1995) 187

Microbial activity

Biological effects of soil compaction, 35 (1995) 53

Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping, 34 (1995) 41

Microbial biomass

Effect of plant residue and fertilizer on grain yield of dryland rice under reduced tillage cultivation, 34 (1995) 115

Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189

Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1

Soil organic carbon, microbial biomass and CO₂-C production from three tillage systems, 33 (1995) 17

Microbial biomass carbon

Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina, 38 (1996) 265

Minimum tillage

Strength characteristics of a potentially hardsetting soil under pasture and conventional tillage in the semi-arid region of Australia, 34 (1995) 105

Effects of conventional and minimum tillage on winter oilseed rape (*Brassica napus* L.) in a sandy soil, 33 (1995) 91

Model

An improved technique for agricultural implement draught analysis, 35 (1995) 175
Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161
Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69

Moldboard plow

Yield and nitrogen uptake of monocropped maize from a long-term tillage experiment on a poorly drained soil, 34 (1995) 145

Monosaccharides

Carbohydrate composition in relation to structural stability, compactibility and plasticity of two soils in a long-term experiment, 39 (1996) 143

Mouldboard plough

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Mulch tillage

Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Mulching

Water use pattern and productivity of rainfed yellow sarson (*Brassica rapa* L. var *glauca*) in relation to tillage and mulching, 38 (1996) 153

¹⁵N

Interactions of traffic and tillage applied to cotton on N movement below the root zone of a subsequent wheat crop, 33 (1995) 3
Traffic and residue management systems: effects on fate of fertilizer N in corn, 33 (1995) 197

N mineralization-immobilization

Influence of long-term tillage, straw and N fertilizer on barley yield, plant-N uptake and soil-N balance, 36 (1995) 165

N-mineralization

Effect of plant residue and fertilizer on grain yield of dryland rice under reduced tillage cultivation, 34 (1995) 115

Near-saturated hydraulic conductivity

Characterisation of water transmission properties in tilled and untilled soils using tension infiltrometers, 33 (1995) 117

Nematodes

Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59

Nigerian soils

Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199

Nitrate

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Nitrate leaching

Influence of long-term tillage, straw and N fertilizer on barley yield, plant-N uptake and soil-N balance, 36 (1995) 165

Nitrogen

Modelling the environmental impacts of soil compaction: a review, 35 (1995) 69
Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115

Nitrogen mineralization

Effects of soil compaction on N-mineralization and microbial-C and -N. I. Field measurements, 38 (1996) 175
Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189
Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1

Nitrogen yield

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141

No-till

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic Haploboroll in southwestern Saskatchewan, 37 (1996) 3

No-tillage

A comparison between seasonal changes in soil water storage and penetration resistance under conventional and conservation tillage systems in Aragón, 37 (1996) 251

Control of soil acidity in no-tillage system for soybean production, 38 (1996) 47

Effects of tillage systems on energy and carbon balance in north-eastern Italy, 40 (1997) 209

Residue management for irrigated maize grain and silage production, 39 (1996) 101

Runoff and sediment loss from three tillage systems under simulated rainfall, 39 (1996) 115

Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67

Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Characterisation of water transmission properties in tilled and untilled soils using tension infiltrometers, 33 (1995) 117

Yield and nitrogen uptake of monocropped maize from a long-term tillage experiment on a poorly drained soil, 34 (1995) 145

Non-inversion tillage

Strength characteristics of a potentially hardsetting soil under pasture and conventional tillage in the semi-arid region of Australia, 34 (1995) 105

Northern Alberta

Weed flora in the early growth period of spring crops under conventional, reduced, and zero tillage systems on a clay soil in northern Alberta, Canada, 33 (1995) 65

Nutrient losses

Effects of soil compaction and tillage systems on uptake and losses of nutrients, 35 (1995) 37

Nutrient losses from cropland in the Central Highlands of Kenya due to surface runoff and soil erosion, 33 (1995) 109

Nutrient uptake

Do effects of soil compaction persist after ploughing? Results from 21 long-term field experiments in Sweden, 39 (1996) 175

Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway, 39 (1996) 131

Effects of soil compaction and tillage systems on uptake and losses of nutrients, 35 (1995) 37

ODR

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Oats

Axle load and tillage effects on crop yields on a Mollic Ochraqqualf in Northwest Ohio, 37 (1996) 143

Opener design

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Operating speed

Draft-speed relationship of simple tillage tools at high operating speeds, 39 (1996) 61

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Optimum properties for agricultural soils

Methods for determining the effects of soil compaction produced by traffic and indices of efficiency for reducing these effects, 40 (1997) 239

Organic N

Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic Haploboroll in southwestern Saskatchewan, 37 (1996) 3

Organic carbon

Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina, 38 (1996) 265

Organic matter

Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1

Organic soil

Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211

Orthogonal regression

An improved technique for agricultural implementation draught analysis, 35 (1995) 175

Oxic Paleustalf

Strength characteristics of a potentially hardsetting soil under pasture and conventional tillage in the semi-arid region of Australia, 34 (1995) 105

Pan lysimeters

Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Paraplow

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Particle speed

Draft-speed relationship of simple tillage tools at high operating speeds, 39 (1996) 61

Pasture

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199
Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189

Pearl millet yield losses

Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31

Pedofeatures

Structure and pedofeatures of Guanajuato (Mexico) Vertisol under different cropping systems, 37 (1996) 15

Penetration resistance

A portable micro-penetrometer for measuring seed row compaction, 34 (1995) 27
Soil bulk density, penetration resistance, and hydraulic conductivity under controlled traffic conditions, 37 (1996) 67
Soil physical factors limiting establishment of sorghum and cowpea in two contrasting soil types in the semi-arid tropics, 40 (1996) 89

The effectiveness of cultivation using the winged tine on restored sand and gravel workings, 40 (1997) 111

Penetrometer

Residual effects of slit tillage and subsoiling in a hardpan soil, 35 (1995) 115

Penetrometer resistance

Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield, 38 (1996) 35
The effects of radial soil confinement and probe diameter on penetrometer resistance, 38 (1996) 59

Percolation rate

Puddling and N management effects on crop response in a rice-wheat cropping system, 36 (1995) 129

pH

Influence of dryland agricultural management practices on the acidification of a soil profile, 37 (1996) 127
Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Phosphate

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Phosphogypsum

Control of soil acidity in no-tillage system for soybean production, 38 (1996) 47

Phosphorous losses

Nutrient losses from cropland in the Central Highlands of Kenya due to surface runoff and soil erosion, 33 (1995) 109

Phosphorus release

Tillage and amendment effects on soil carbon and nitrogen mineralization and phosphorus release, 37 (1996) 239

Photogrammetry

Mapping a three-dimensional soil surface with hand-held 35 mm photography, 34 (1995) 187

Photography

Mapping a three-dimensional soil surface with hand-held 35 mm photography, 34 (1995) 187

Physical soil degradation

Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229

Plant growth and yield

Tillage and residue management influence on corn growth, 33 (1995) 215

Plasticity limits

Carbohydrate composition in relation to structural stability, compactibility and plasticity of two soils in a long-term experiment, 39 (1996) 143

Plough layer

Do effects of soil compaction persist after ploughing? Results from 21 long-term field experiments in Sweden, 39 (1996) 175

Plough tillage

Effects of tillage systems on energy and carbon balance in north-eastern Italy, 40 (1997) 209

Ploughing

Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Effect of ploughing down the steepest slope, 35 (1995) 157

Poor drainage

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Poorly drained soils

Yield and nitrogen uptake of monocropped maize from a long-term tillage experiment on a poorly drained soil, 34 (1995) 145

Pore shape

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Pore size distribution

Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Potassium

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Potassium nutrition

Cotton response to in-row subsoiling and potassium fertilizer placement in Alabama, 40 (1997) 145

Potato yield and quality

Effects of mouldboard ploughing and direct planting on yield and nutrient uptake of potatoes in Norway, 39 (1996) 131

Potatoes

Conservation tillage systems, fungal complexes and disease development in soybean and barley rhizospheres in Prince Edward Island, 34 (1995) 225

Zone tillage effects on soil properties and yield and quality of potatoes (*Solanum tuberosum* L.), 35 (1995) 135

Poultry wastes

Tillage and amendment effects on soil carbon and nitrogen mineralization and phosphorus release, 37 (1996) 239

Power requirement

Zero and reduced ground pressure traffic systems in an arable rotation I. Cultivation power requirement, 38 (1996) 71

Pre-emergent shoot growth

Pre-emergent shoot growth of maize (*Zea mays*, L.) as a function of soil strength, 40 (1996) 3

Press wheel

Enhancement of wheat establishment with modified sowing and fallow management techniques, 36 (1995) 73

Primary tillage

Characterization of soil physical properties and organic matter under long-term primary tillage in a humid climate, 38 (1996) 251

Probe diameter

The effects of radial soil confinement and probe diameter on penetrometer resistance, 38 (1996) 59

Proctor density

A method to predict bulk density of tilled Ap horizons, 34 (1995) 95

Production costs

Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183

qCO₂

Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina, 38 (1996) 265

Quadrat count

Statistical analysis of wheat root growth patterns under conventional and no-till systems, 38 (1996) 1

Quality of the environment

Implications of soil compaction in crop production for the quality of the environment, 35 (1995) 5

Rainfed lowland rice

Subsoil compaction to improve water use efficiency and yields of rainfed lowland rice in coarse-textured soils, 36 (1995) 33

Random point process

Statistical analysis of wheat root growth patterns under conventional and no-till systems, 38 (1996) 1

Rapeseed

Effects of conventional and minimum tillage on winter oilseed rape (*Brassica napus* L.) in a sandy soil, 33 (1995) 91

Reclamation

The effectiveness of cultivation using the winged tine on restored sand and gravel workings, 40 (1997) 111

Reduced tillage

A comparison between seasonal changes in soil water storage and penetration resistance under

conventional and conservation tillage systems in Aragón, 37 (1996) 251

Tillage, hybrid and thermal factors in corn establishment in cool soils, 40 (1996) 39

Reference soil condition

Prediction of agricultural implement draft using an instrumented analog tillage tool, 37 (1996) 47

Relative emergence

Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61

Repeated loads

Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161

Residual effects

Do effects of soil compaction persist after ploughing? Results from 21 long-term field experiments in Sweden, 39 (1996) 175

Residue

Dry bean production with various tillage and residue management systems, 36 (1995) 97

Residue management

Residue management for irrigated maize grain and silage production, 39 (1996) 101

Seed-row residue management for corn establishment in the northern US Corn Belt, 40 (1996) 55

Tillage and residue management influence on corn growth, 33 (1995) 215

Respiration

Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina, 38 (1996) 265

Reversible plough

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Rhizodeposition

Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping, 34 (1995) 41

Ridge tillage

Effects of tillage systems on energy and carbon balance in north-eastern Italy, 40 (1997) 209

Rock fragments

Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229

Root growth

Biological effects of soil compaction, 35 (1995) 53

Effects of deep tillage on dryland production of redgram (*Cajanus cajan* L.) in Central India, 34 (1995) 17

Puddling and N management effects on crop response in a rice-wheat cropping system, 36 (1995) 129

Tillage, mulch and irrigation effects on corn (*Zea mays* L.) in relation to evaporative demand, 39 (1996) 213

The potential restriction to root growth in structurally weak tropical soils, 33 (1995) 133

Root patterns

Statistical analysis of wheat root growth patterns under conventional and no-till systems, 38 (1996) 1

Rotary cultivation

Earthworm populations (Lumbricidae) in ploughed and undisturbed leys, 35 (1995) 125

Rotavator

A comparison between a rotavator and conventional tillage equipment for wheat-soybean rotations on a vertisol in Central India, 37 (1996) 191

Row roughness

Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127

Rubber track

Compaction effects of rubber or metal-tracked tractor passes on agricultural soils, 37 (1996) 37

Runoff

Tillage and application effects on herbicide leaching and runoff, 39 (1996) 241

Rupture angle

A modified model to predict soil cutting resistance, 34 (1995) 157

Saturated hydraulic conductivity

Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

Scaling

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Seasonal effects

Tillage, mulch and irrigation effects on corn (*Zea mays* L.) in relation to evaporative demand, 39 (1996) 213

Secondary tillage

The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Seed priming

The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana, 40 (1996) 73

Seed-soil contact

Effect of soil macroporosity and aggregate size on seed-soil contact, 38 (1996) 203

Seedbed

A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211

The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Seeding depth

Effect of soil characteristics, seeding depth, operating speed, and opener design on draft force during direct seeding, 39 (1996) 199

Seedling emergence

Seed-row residue management for corn establishment in the northern US Corn Belt, 40 (1996) 55

Semi-arid

Enhancement of wheat establishment with modified sowing and fallow management techniques, 36 (1995) 73

Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1

Semi-arid soils

Interactive effects of tillage and crop rotations on yield and chemical properties of soils in semi-arid central Spain, 36 (1995) 45

Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59

Semi-arid tropics

Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31

Sensor

A portable micro-penetrometer for measuring seed row compaction, 34 (1995) 27

"Set-aside" land

The costs of alternative methods of managing 'set-aside' land within the European Community, 37 (1996) 273

Shear modulus

Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161

Slaking

Strength characteristics of a potentially hardsetting soil under pasture and conventional tillage in the semi-arid region of Australia, 34 (1995) 105

Sodium

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Soil

A portable micro-penetrometer for measuring seed row compaction, 34 (1995) 27

Spatial variability of soil thermal properties in cultivated fields, 39 (1996) 85

The energy efficiency of seedbed preparation following mouldboard ploughing, 39 (1996) 13

Soil acidification

Influence of dryland agricultural management practices on the acidification of a soil profile, 37 (1996) 127

Soil acidity

Control of soil acidity in no-tillage system for soybean production, 38 (1996) 47

Soil aeration

Subsoiling and surface tillage effects on soil physical properties and forage oat stand and yield, 40 (1997) 125

Soil aggregation

The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113

Soil compaction

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Biological effects of soil compaction, 35 (1995) 53

Do effects of soil compaction persist after ploughing? Results from 21 long-term field experiments in Sweden, 39 (1996) 175

Effect of soil macroporosity and aggregate size on seed-soil contact, 38 (1996) 203

Effects of soil compaction and tillage systems on uptake and losses of nutrients, 35 (1995) 37

Effects of soil compaction on N-mineralization and microbial-C and -N. I. Field measurements, 38 (1996) 175

Effects of soil compaction on N-mineralization and microbial-C and -N. II. Laboratory simulation, 38 (1996) 189

Implications of soil compaction in crop production for the quality of the environment, 35 (1995) 5

Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles, 35 (1995) 85

Repair of the structure of a compacted Vertisol via wet/dry cycles, 38 (1996) 17

Soil compaction processes and their effects on the structure of arable soils and the environment, 35 (1995) 23

Subsoil compaction to improve water use efficiency and yields of rainfed lowland rice in coarse-textured soils, 36 (1995) 33

Technical and economic feasibility of low ground pressure running gear, 35 (1995) 99

Traffic and residue management systems: effects on fate of fertilizer N in corn, 33 (1995) 197

Soil conditions

Grassland converted to cropland: Soil conditions and sorghum yield, 33 (1995) 29

Soil confinement

The effects of radial soil confinement and probe diameter on penetrometer resistance, 38 (1996) 59

Soil conservation

Comparative analysis of the field performances of a reversible animal-drawn prototype and conventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169

Protection of soils from mechanical overloading by establishing limits for stresses caused by heavy vehicles, 35 (1995) 85

Soil criteria

Soil criteria for assessing the maximum permissible ground pressure of agricultural vehicles on Chernozem soils, 36 (1995) 153

Soil cultivation

Earthworm populations (Lumbricidae) in ploughed and undisturbed leys, 35 (1995) 125

Soil deformation

Methods for determining the effects of soil compaction produced by traffic and indices of efficiency for reducing these effects, 40 (1997) 239

Soil degradation

Effects of conservation and conventional tillage systems after land clearing on soil properties and crop yield in Santa Cruz, Bolivia, 38 (1996) 133

Soil disturbance

Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127

Soil erosion

Economic evaluation of topsoil loss in spring wheat production in the northern Great Plains, USA, 37 (1996) 95

Nutrient losses from cropland in the Central Highlands of Kenya due to surface runoff and soil erosion, 33 (1995) 109

Soil fauna

Biological effects of soil compaction, 35 (1995) 53

Soil fertility

Effect of plant residue and fertilizer on grain yield of dryland rice under reduced tillage cultivation, 34 (1995) 115

Soil matric potential

Enhancement of wheat establishment with modified sowing and fallow management techniques, 36 (1995) 73

Soil mechanics

Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161

Soil microbial biomass

Effects of soil compaction on N-mineralization and microbial-C and -N. I. Field measurements, 38 (1996) 175

Soil moisture

Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield, 38 (1996) 35

Tillage-induced seasonal changes in soil physical properties affecting soil CO₂ evolution under intensive cropping, 34 (1995) 41

Soil moisture deficit

Prediction of trafficability and workability from soil moisture deficit, 40 (1997) 155

Soil nitrogen

Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system. I. Soil water and nitrogen conservation, crop growth and yield, 34 (1995) 79

Soil on slope

Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Ef-

fect of ploughing down the steepest slope, 35 (1995) 157

Erosion due to cultivation of calcareous clay soils on the hillsides of south west France. I. Effect of former farming practices, 35 (1995) 147

Soil organic carbon

Strength characteristics of a potentially hardsetting soil under pasture and conventional tillage in the semi-arid region of Australia, 34 (1995) 105

Soil organic matter

Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115

Soil organic carbon, microbial biomass and CO₂-C production from three tillage systems, 33 (1995) 17

Soil organic matter loss

Effects of conservation and conventional tillage systems after land clearing on soil properties and crop yield in Santa Cruz, Bolivia, 38 (1996) 133

Soil penetrometer resistance

Persistence of soil compaction due to high axle load traffic. II. Long-term effects on the properties of fine-textured and organic soils, 37 (1996) 223

Soil physical and biological quality

Characterization of soil physical properties and organic matter under long-term primary tillage in a humid climate, 38 (1996) 251

Soil physical properties

Runoff and sediment loss from three tillage systems under simulated rainfall, 39 (1996) 115

Soil compaction processes and their effects on the structure of arable soils and the environment, 35 (1995) 23

Soil-water and soil physical properties under contour hedgerow systems on sloping oxisols, 40 (1997) 185

Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199

Soil porosity

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Soil quality

Influence of long-term tillage, straw and N fertilizer on barley yield, plant-N uptake and soil-N balance, 36 (1995) 165

Soil resistance

A modified model to predict soil cutting resistance, 34 (1995) 157

Soil physical constraints to establishment of mungbeans (*Vigna radiata* L. Wilczek) in paddy rice (*Oryza sativa* L.) soils, 33 (1995) 47

Soil respiration

Soil organic carbon, microbial biomass and CO₂-C production from three tillage systems, 33 (1995) 17

Soil strength

A comparison between seasonal changes in soil water storage and penetration resistance under conventional and conservation tillage systems in Aragón, 37 (1996) 251

Pre-emergent shoot growth of maize (*Zea mays*, L.) as a function of soil strength, 40 (1996) 3

Residual effects of slit tillage and subsoiling in a hardpan soil, 35 (1995) 115

The effects of radial soil confinement and probe diameter on penetrometer resistance, 38 (1996) 59

Tillage and straw management for modifying physical properties of a subarctic soil, 38 (1996) 239

Tillage, mulch and irrigation effects on corn (*Zea mays* L.) in relation to evaporative demand, 39 (1996) 213

Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses, 38 (1996) 89

Soil physical constraints to establishment of mungbeans (*Vigna radiata* L. Wilczek) in paddy rice (*Oryza sativa* L.) soils, 33 (1995) 47

The potential restriction to root growth in structurally weak tropical soils, 33 (1995) 133

Soil stress

Technical and economic feasibility of low ground pressure running gear, 35 (1995) 99

Soil structure

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199

A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211

An assessment of the vulnerability of soil structure to destabilisation during tillage. Part I. A laboratory test, 37 (1996) 161

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Soil structure repair

Repair of the structure of a compacted Vertisol via wet/dry cycles, 38 (1996) 17

Soil surface

Mapping a three-dimensional soil surface with hand-held 35 mm photography, 34 (1995) 187

Soil temperature

Soil physical factors limiting establishment of sorghum and cowpea in two contrasting soil types in the semi-arid tropics, 40 (1996) 89

Tillage, hybrid and thermal factors in corn establishment in cool soils, 40 (1996) 39

Tillage and residue management influence on corn growth, 33 (1995) 215

Soil tillage

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

The structure of two alluvial soils in Italy after 10 years of conventional and minimum tillage, 34 (1995) 209

Tillage effects on plant extractable soil water in a silty clay vertisol in Southern Italy, 40 (1997) 227

Soil water

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system. I. Soil water and nitrogen conservation, crop growth and yield, 34 (1995) 79

Soil water content

A comparison between seasonal changes in soil water storage and penetration resistance under conventional and conservation tillage systems in Aragón, 37 (1996) 251

Soil water retention

Soil-water and soil physical properties under contour hedgerow systems on sloping oxisols, 40 (1997) 185

Soil water transmissivity

Soil-water and soil physical properties under contour hedgerow systems on sloping oxisols, 40 (1997) 185

Soil

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Identification of pre-existing cracks on soil fracture surfaces using dye, 33 (1995) 163

Sorghum

The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana, 40 (1996) 73

Sorptivity

Residue management for irrigated maize grain and silage production, 39 (1996) 101

Sowing date

The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana, 40 (1996) 73

Sowing point

A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211

Soybean

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

- Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*, L. Merr.) and maize (*Zea mays*, L.), 33 (1995) 149
- Spatial variability**
Spatial variability of soil thermal properties in cultivated fields, 39 (1996) 85
- Speed of emergence**
Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127
Seedling emergence as influenced by aggregate size, bulk density, and penetration resistance of the seedbed, 34 (1995) 61
- Spring barley**
Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183
- Spring cereals**
Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141
- Spring wheat**
Economic evaluation of topsoil loss in spring wheat production in the northern Great Plains, USA, 37 (1996) 95
- Stabilisation**
The influence of crop rotation on soil structure and soil physical properties under conventional tillage, 37 (1996) 113
- Stand establishment**
The effects of manure, genotype, seed priming, depth and date of sowing on the emergence and early growth of *Sorghum bicolor* (L.) Moench in semi-arid Botswana., 40 (1996) 73
Tillage, hybrid and thermal factors in corn establishment in cool soils, 40 (1996) 39
- Standard tillage tool**
Prediction of agricultural implement draft using an instrumented analog tillage tool, 37 (1996) 47
- Stool destruction**
Comparison of options for sugarcane (*Saccharum officinarum* L.) stool destruction, 33 (1995) 185
- Stratification**
Influence of dryland agricultural management practices on the acidification of a soil profile, 37 (1996) 127
- Stresses**
Methods for determining the effects of soil compaction produced by traffic and indices of efficiency for reducing these effects, 40 (1997) 239
- Strip seeding**
Effectiveness of a strip seeder direct drill for pasture establishment, 38 (1996) 161
- Strip tillage**
Tillage and amendment effects on soil carbon and nitrogen mineralization and phosphorus release, 37 (1996) 239
Interactions of traffic and tillage applied to cotton on N movement below the root zone of a subsequent wheat crop, 33 (1995) 3
- Structure**
Critical state parameters from intact samples of two agricultural topsoils, 39 (1996) 161
Structure and pedofeatures of Guanajuato (Mexico) Vertisol under different cropping systems, 37 (1996) 15
Identification of pre-existing cracks on soil fracture surfaces using dye, 33 (1995) 163
- Stubble**
Influence of dryland agricultural management practices on the acidification of a soil profile, 37 (1996) 127
- Stubble mulch**
Grassland converted to cropland: Soil conditions and sorghum yield, 33 (1995) 29
- Stubble retention**
Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system. I. Soil

water and nitrogen conservation, crop growth and yield, 34 (1995) 79

Subsidence

Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229

Subsoil

Incorporation of limestone into naturally compacted subsoil during deep-ripping, 36 (1995) 21

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141

Subsoiling

Effect of subsoiling and subsequent tillage on soil bulk density, soil moisture, and corn yield, 38 (1996) 35

Zone tillage effects on soil properties and yield and quality of potatoes (*Solanum tuberosum* L.), 35 (1995) 135

Interactions of traffic and tillage applied to cotton on N movement below the root zone of a subsequent wheat crop, 33 (1995) 3

Sugar beet

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Direct drilling of sugar beet (*Beta vulgaris* L.) into a cover crop: effects on soil physical conditions and crop establishment, 34 (1995) 169

Sugarcane

Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115

Comparison of options for sugarcane (*Saccharum officinarum* L.) stool destruction, 33 (1995) 185

Sulfate

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Summer fallow

Tillage and crop rotation effects on soil organic C and N in a coarse-textured Typic Haploboroll in southwestern Saskatchewan, 37 (1996) 3

Surface runoff

Nutrient losses from cropland in the Central Highlands of Kenya due to surface runoff and soil erosion, 33 (1995) 109

Surface tillage

Traffic and residue management systems: effects on fate of fertilizer N in corn, 33 (1995) 197

Tensile strength

The effect of matric suction on stress-strain relation and strength of three Alfisols, 39 (1996) 45

Tension infiltrometer

Ant burrow effects on water flow and soil hydraulic properties of Sparta sand, 37 (1996) 83

Characterisation of water transmission properties in tilled and untilled soils using tension infiltrometers, 33 (1995) 117

Thermal properties

Spatial variability of soil thermal properties in cultivated fields, 39 (1996) 85

Tillage

A comparison between a rotavator and conventional tillage equipment for wheat-soybean rotations on a vertisol in Central India, 37 (1996) 191

An assessment of the vulnerability of soil structure to destabilisation during tillage. Part I. A laboratory test, 37 (1996) 161

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

An improved technique for agricultural implement draught analysis, 35 (1995) 175

Ant burrow effects on water flow and soil hydraulic properties of Sparta sand, 37 (1996) 83

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Axle load and tillage effects on crop yields on a Mollic Ochraqualf in Northwest Ohio, 37 (1996) 143

Draft-speed relationship of simple tillage tools at high operating speeds, 39 (1996) 61

Dry bean production with various tillage and residue management systems, 36 (1995) 97

- Effect of different tillage systems on soil properties and wheat yield in Middle Anatolia, 40 (1997) 201
- Erosion due to cultivation of calcareous clay soils on hillsides in south-west France. II. Effect of ploughing down the steepest slope, 35 (1995) 157
- Erosion due to cultivation of calcareous clay soils on the hillsides of south west France. I. Effect of former farming practices, 35 (1995) 147
- Influence of dryland agricultural management practices on the acidification of a soil profile, 37 (1996) 127
- Interactive effects of tillage and crop rotations on yield and chemical properties of soils in semi-arid central Spain, 36 (1995) 45
- Seed-row residue management for corn establishment in the northern US Corn Belt, 40 (1996) 55
- Soil organic matter pools with conventional and zero tillage in a cold, semiarid climate, 39 (1996) 1
- Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229
- Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system. I. Soil water and nitrogen conservation, crop growth and yield, 34 (1995) 79
- Variability in soil nematode populations due to tillage and crop rotation in semi-arid Mediterranean agrosystems, 36 (1995) 59
- Water use pattern and productivity of rainfed yellow sarson (*Brassica rapa* L. var *glauca*) in relation to tillage and mulching, 38 (1996) 153
- Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31
- Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229
- Grassland converted to cropland: Soil conditions and sorghum yield, 33 (1995) 29
- Soil physical constraints to establishment of mungbeans (*Vigna radiata* L. Wilczek) in paddy rice (*Oryza sativa* L.) soils, 33 (1995) 47
- Tillage and residue management influence on corn growth, 33 (1995) 215
- ventional mouldboard ploughs pulled by a single donkey, 40 (1997) 169
- Tillage systems**
- Influence of tillage systems on biological properties of a Typic Argiudoll soil under continuous maize in central Argentina, 38 (1996) 265
- Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183
- Tillage terminology**
- Tillage terminology, 34 (1995) 1
- Tillage tool**
- A modified model to predict soil cutting resistance, 34 (1995) 157
- Tillage, draft**
- Prediction of agricultural implement draft using an instrumented analog tillage tool, 37 (1996) 47
- Timeliness**
- Zero and reduced ground pressure traffic systems in an arable rotation I. Cultivation power requirement, 38 (1996) 71
- Topsoil value**
- Economic evaluation of topsoil loss in spring wheat production in the northern Great Plains, USA, 37 (1996) 95
- Total porosity**
- Persistence of soil compaction due to high axle load traffic. I. Short-term effects on the properties of clay and organic soils, 37 (1996) 211
- Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199
- Traction**
- Methods for determining the effects of soil compaction produced by traffic and indices of efficiency for reducing these effects, 40 (1997) 239
- Tractor**
- Compaction effects of rubber or metal-tracked tractor passes on agricultural soils, 37 (1996) 37
- Tillage implement**
- Comparative analysis of the field performances of a reversible animal-drawn prototype and con-

Traffic

Traffic and residue management systems: effects on fate of fertilizer N in corn, 33 (1995) 197

Traffic systems

Zero and reduced ground pressure traffic systems in an arable rotation 1. Cultivation power requirement, 38 (1996) 71

Zero and reduced ground pressure traffic systems in an arable rotation 2. Soil and crop responses, 38 (1996) 89

Trafficability

Prediction of trafficability and workability from soil moisture deficit, 40 (1997) 155

Trampling

A comparison between continuous and controlled grazing on a red duplex soil. I. Effects on soil physical characteristics, 35 (1995) 199

Transport

Applications of fractals in soil and tillage research: a review, 36 (1995) 1

Trash

Simulation of the effects of trash and N fertilizer management on soil organic matter levels and yields of sugarcane, 38 (1996) 115

Tyres

Technical and economic feasibility of low ground pressure running gear, 35 (1995) 99

Upland crop

Soil physical constraints to establishment of mungbeans (*Vigna radiata* L. Wilczek) in paddy rice (*Oryza sativa* L.) soils, 33 (1995) 47

Variance-mean ratio

Statistical analysis of wheat root growth patterns under conventional and no-till systems, 38 (1996) 1

Vertical separation

Evaluation of performance of furrow openers of combined seed and fertiliser drills, 34 (1995) 127

Vertisol

A comparison between a rotavator and conventional tillage equipment for wheat-soybean ro-

tations on a vertisol in Central India, 37 (1996) 191

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

Structure and pedofeatures of Guanajuato (Mexico) Vertisol under different cropping systems, 37 (1996) 15

Water balance

Tillage effects on plant extractable soil water in a silty clay vertisol in Southern Italy, 40 (1997) 227

Water conservation

Effects of rock fragments on physical degradation of cultivated soils by rainfall, 33 (1995) 229

Water use pattern and productivity of rainfed yellow sarson (*Brassica rapa* L. var *glauca*) in relation to tillage and mulching, 38 (1996) 153

Water conservation in situ

Subsoil compaction to improve water use efficiency and yields of rainfed lowland rice in coarse-textured soils, 36 (1995) 33

Water content

Effect of aggregate size and soil water content on emergence of soybean (*Glycine max*, L. Merr.) and maize (*Zea mays*, L.), 33 (1995) 149

Spatial variability of soil thermal properties in cultivated fields, 39 (1996) 85

Water Erosion Prediction Project (WEPP)

A method to predict bulk density of tilled Ap horizons, 34 (1995) 95

Water intake models

Testing the goodness of fit of infiltration models for highly permeable soils under different tropical soil management systems, 34 (1995) 199

Waterlogging

An evaluation of controlled traffic with reduced tillage for irrigated cotton on a Vertisol, 38 (1996) 217

Water use efficiency

Subsoil compaction to improve water use efficiency and yields of rainfed lowland rice in coarse-textured soils, 36 (1995) 33

Water use pattern and productivity of rainfed yellow sarson (*Brassica rapa* L. var *glauca*) in relation to tillage and mulching, 38 (1996) 153

Wave propagation

Draft-speed relationship of simple tillage tools at high operating speeds, 39 (1996) 61

Weakly structured soils

The potential restriction to root growth in structurally weak tropical soils, 33 (1995) 133

Weed control

Dry bean production with various tillage and residue management systems, 36 (1995) 97

Weed diversity

Weed flora in the early growth period of spring crops under conventional, reduced, and zero tillage systems on a clay soil in northern Alberta, Canada, 33 (1995) 65

Weed growth

Effects of deep tillage on dryland production of redgram (*Cajanus cajan* L.) in Central India, 34 (1995) 17

Wet/dry cycles

Repair of the structure of a compacted Vertisol via wet/dry cycles, 38 (1996) 17

Wheat

A comparison between continuous and controlled grazing on a red duplex soil. II. Subsequent effects on seedbed conditions, crop establishment and growth, 35 (1995) 211

Effect of different tillage systems on soil properties and wheat yield in Middle Anatolia, 40 (1997) 201

Wheat growth and yield

Stubble retention and nitrogen fertilisation in a fallow-wheat rainfed cropping system. I. Soil water and nitrogen conservation, crop growth and yield, 34 (1995) 79

Winged tine

The effectiveness of cultivation using the winged tine on restored sand and gravel workings, 40 (1997) 111

Winter wheat

Long-term energy use and economic evaluation of three tillage systems for cereal and legume production in central Spain, 35 (1995) 183

Rotation and tillage effects on available soil water for winter wheat in a semi-arid environment, 36 (1995) 111

Within-row and between-row weed growth

Weeding method and pre-sowing tillage effects on weed growth and pearl millet yield in a sandy soil of the West African Sahelian zone, 39 (1996) 31

Workability

Prediction of trafficability and workability from soil moisture deficit, 40 (1997) 155

Xylem water potential

Puddling and N management effects on crop response in a rice-wheat cropping system, 36 (1995) 129

Yield

Effect of different tillage systems on soil properties and wheat yield in Middle Anatolia, 40 (1997) 201

Long-term effects of a single compaction by heavy field traffic on yield and nitrogen uptake of annual crops, 36 (1995) 141

Young's modulus

The effect of matric suction on stress-strain relation and strength of three Alfisols, 39 (1996) 45

Zero tillage

Influence of long-term tillage, straw and N fertilizer on barley yield, plant-N uptake and soil-N balance, 36 (1995) 165

Zero-tillage for rice production on Cameroonian Vertisols, 39 (1996) 75

Zinc

Soil-profile distribution of primary and secondary plant-available nutrients under conventional and no tillage, 39 (1996) 229

Zone tillage

Zone tillage effects on soil properties and yield and quality of potatoes (*Solanum tuberosum* L.), 35 (1995) 135
